

MK2 External Butt Weld Bead Removal Tool 400mm

The Caldertech MK2 External Bead Removal Tool 400 is a high quality tool designed for the removal of external beads formed as a result of the butt fusion welding process, for HDPE pipe sizes 125-400mm.

The tool will peel the bead away from the pipe's surface whether it's hot or cold, leaving a flush finish and enabling the pipe to be smoothly slip-lined into a larger diameter pipe, as well as a closer inspection of the weld to detect potential defects.

Changeable Blade

FEATURES

- Simple and easy to use
- Adjustable guides for correct pipe diameter 125mm-400mm
- Bead width up to 30mm
- Changeable blade
