

## External Butt Weld Bead Removal Tool 630mm

The Caldertech External Bead Removal Tool 630 is a high quality tool designed for the removal of external beads formed as a result of the butt fusion welding process, for HDPE pipe sizes 355-630mm.

The tool will peel the bead away from the pipe's surface whether it's hot or cold, leaving a flush finish and enabling the pipe to be smoothly slip-lined into a larger diameter pipe, as well as a closer inspection of the weld to detect potential defects.

Changeable Blade

### FEATURES

- Simple and easy to use
- Adjustable guides for correct pipe diameter 355mm-630mm
- Bead width up to 35mm
- Changeable blade

Code	Description
01-07-504	External bead removal tool 355-630mm
01-07-505	Cutting blade for 355-630mm external bead removal tool
